REASONS FOR ALLOWANCE

1. Applicant's amendment and arguments filed 10/26/2004, with respect to claims 1-31 have been fully considered and are persuasive. The rejection of claims 1-31 has been withdrawn.

2. The following is an examiner's statement of reasons for allowance: None of the prior art in record taken alone or in combination discloses the combined claimed limitations including a system and method for removing gaps from streams of packets comprising a packet splitter configured to receive the packets, each of the packets including a packet header and packet data, and separate the packet header from the packet data for each of the packets; a header buffer configured to store the packet headers; a data buffer configured to store the packet data; and a packet combiner configured to reassemble the packets from the packet headers in the header buffer and the packet data in the data buffer, the reassembling causing gaps to occur between the packet headers and the packet data within the reassembled packets, and remove the gaps from the reassembled packets.

Also, none of the prior art in record taken alone or in combination discloses the combined claimed limitations including a system and method that operates in first and second modes to remove gaps from streams of data, comprising handshake logic configured to obtain a header portion and a body portion of a data unit corresponding to one of the data streams, and reassemble the data stream from the header and body portions; a first multiplexer configured to multiplex the reassembled data stream from the handshake logic; a byte packer configured to remove gaps from data units within the multiplexed data stream to generate a gap-free data
